## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on 11 July 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

### **DETAILED ACTION**

Applicant's arguments filed 7/11/05 have been fully considered but they are not persuasive. See argument below.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 47,48,54,76,78 are rejected under 35 U.S.C. 102(e) as being anticipated by Dolan et al (US 2005187289 or 11/115849; 4/26/05). Dolan teaches a method of topically applying to an animal a composition comprising nootkatone in order to control (repel or kill) arthropods (ticks). See claims 1-23, page 1- page 3 line 2, abstract.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 49-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dolan as applied to claims 47,48, 54, 76, and 78 above. See 102(e) rejection above. Dolan teaches all that is recited in claims 49-50 except for the instant amount of

Art Unit: 1616

nootkatone. It would have been obvious to one having ordinary skill in the art to determine the optimum amount of nootkatone to administer. One would have been motivated to do this in order to develop a method that would have been most effective in controlling ticks.

***Claim Objection / Allowable Subject Matter***

Claims 51,52,76 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant method comprising bicyclovetivenol or zizanol (claims 51,52). The prior art does not teach or suggest the instant method of claim 77 comprising specified materials.

Claims 25,26,28,31-33,75,79-81 are allowable. The prior art does not teach or suggest the instant invention comprising treating materials with zizanol and bicyclovetivenol to repel ticks or cockroaches from the material. The prior art does not teach or suggest the instant invention comprising treating materials with alpha-cedrene to repel cockroaches from the material.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1616

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
